Certified Test Equipment

Ensure ISO Quality Standards with Certified Ransburg Test Equipment

Controlling coating conditions is essential to achieving consistent, high-quality results. Ransburg test equipment offers a reliable way to maintain those conditions and ensure an optimum finish—time after time. Our complete line of certified testing tools reduces downtime, minimizes paint waste, and boosts operational efficiency. Each unit is compact, lightweight, and built for durability, featuring accurate digital readouts with real-time updates to support quality control in demanding production environments.

Certified to ISO Standards

Certified to ASTM Standard

Ground Testing of Conveyorized Products

Ransburg Test Equipment

Sprayability Test Meter, Paint Probe and Test Leads

By measuring the surface resistance of materials normally considered to be electrically nonconductive and indicating the degree of sprayability on a standard scale, the Sprayability/Paint Test Meter can determine whether such materials can be electrostatically sprayed.

Designed to provide measurement of the electrical resistance of paint formulations for all electrostatic applications as well as the short circuit current (SCI) of electrostatic applicators. It has an SCI scale (0 to 250 microamperes) and paint resistance scales (infinity to 0.01 and 2.0 to 0.001 in megohms).

The Paint Test Meter and Probe features:

- Digital multi-scale meter with integrated Sprayability Meter.
- Matching Paint Resistance Probe.
- Gun output test leads for short circuit current (SCI).
- Certified as ASTM standard.

Sprayability Test Meter and kV Probe

The kV Test Probe provides an accurate way to check electrostatic voltage of application equipment.

The kV (kilovolt) Test Probe features:

- Measures kV and surface sprayability in one meter.
- Measures all types of electrostatic equipment.
- Accurately displays throughout the entire measurement range.
- Certified to ISO standards from the factory.

Deluxe Test Equipment Kit Includes:

- Paint Test Probe
- Sprayability/Paint Test Meter
- Gun Output Test Leads
- kV Test Probe Kit
